

IN THE SPECIFICATION

Please amend the paragraphs on page 2, line 31 to page 3, line 2, as follows:

-- Fig. 8 diagrammatically shows a detail of an embodiment of a shaving apparatus of the vibrating type.

~~FIG. 9 illustrates a shaving aid retention means comprising a spiral shaped pattern of ridges.~~

~~FIG. 10 illustrates a shaving aid retention means comprising a star shaped pattern of ridges.~~

~~FIG. 11 illustrates a shaving aid retention means comprising a flower shaped pattern of ridges.~~

~~FIG. 12 illustrates a shaving aid retention means comprising a pattern of dimples.~~

Fig. 1 shows a prior art shaving apparatus to which the invention may be applied, and Fig. 2 shows a similar shaving apparatus.--.

Please amend the paragraph on page 4, lines 19-24, as follows:

-- Though the shaving aid retaining means described above and shown in Figs. 4 and 5 do comprise a number of circular concentric ridges, it will be understood that any type of profile which prevents additive from flowing straight and unimpeded to the hair trapping apertures may be used. For example, a star-shaped pattern of redges ~~(see, e.g., FIG. 10)~~, a flower-shaped pattern or ridges

~~(see, e.g., FIG. 11, or spiral-shaped pattern of ridges (see, e.g., FIG. 9), or a pattern of dimples as on a golf ball (see, e.g., FIG. 12)~~ or similar surface patterns may be used. Furthermore, the decoration cap may have a low friction surface.--.
